### The structure of external migration by selected ethnic groups, as a percentage of the total number

## Interregional population migration

The bar chart shows net migration (people) by region:
- Abai: -4,878
- Akmola: -2,376
- Aktobe: -1,430
- Almaty: -556
- Atyrau: -1,867
- Batys Kazakhstan: -1,527
- Zhambyl: -9,900
- Zhetisu: -6,548
- Karagandy: -3,214
- Kostanai: -2,656
- Kyzylorda: -5,029
- Mangystau: -928
- Pavlodar: -2,053
- Soltustik Kazakhstan: -2,557
- Turkistan: -15,875
- Ulytau: -1,635
- Shygys Kazakhstan: -2,256
- Astana city: 35,755
- Almaty city: 28,136
- Shymkent city: 1,394

net migration

The number of people moving within the country increased by 26%. In terms of interregional movements, a positive net population migration has developed in 3 regions of the country: the cities of Astana (35755 people), Almaty (28136 people), Shymkent (1394 people).

## 2. Dynamic tables

**on years:**
**External migration of the population**
**External migration by country**
**The net migration**

**by month:**
**Migration population growth**
**External migration of the population**
**Internal migration of the population**

## 3. Glossary

Population migration – the movement of people (migrants) across the borders of certain regions with a change of residence;

Number of arrivals – the number of people who entered the region from outside it during the reporting period;

Number of departures – the number of people who left the region outside of it during the reporting period;

Net migration – the difference between the number of arrivals in the region during the reporting period and the number of departures from it.

## 4. Methodological explanations

Population migration is the movement of people (migrants) across the borders of certain regions with a change of residence.

The number of people who arrived in the regions of the republic, as well as the number of departures from them, is determined as a result of the development of statistical arrival and departure coupons received from the Committee of the Migration Service of the Ministry of Internal Affairs, which are compiled during registration of the population at the place of permanent residence.

In the current statistical accounting, the numbers of arrivals and departures are conditionally fixed, but we are talking about the numbers of arrivals and departures.

The main indicators of migration are:

the number of arrivals;

the number of departures;

migration increase (or decrease), net migration, net migration.

Migration intensity indicators characterize the frequency of cases of change of residence in the total population over a certain period. The most commonly used are general annual migration intensity rates per 1.000 population.
