Conventions:

- – fact of absence

0,0 – insignificant value

... – data is not available

In some cases minor discrepancies between totals and sum due to rounding of data.

## **Introduction**

The statistical yearbook «Fixed assets of Kazakhstan» presents indicators characterizing the availability of the fixed assets of the Republic of Kazakhstan, their structure, the dynamics state of assets, renewal and liquidation, the availability and structure of intangible assets.

Indicators across industries for 2010-2014 are presented according to the new version of «SC RK 04-2008 General Classification of Economic Activities (GCEA).»

Statistical Yearbook is designed for a wide range of users: top management personnel, employees of the management, financial and economic departments of enterprises and organizations, scientific, business and banking communities, faculty members of teaching staff and students of economic universities and other interested parties.

## BRIEF METHODOLOGICAL EXPLANATIONS

Fixed assets: Tangible and intangible non-cash assets used in the production or supply of goods, provision of market and non-market services, for rental or administrative purposes, and meet the following requirements:

it is supposed to use them for more than a year; there is a likelihood that such assets are associated with future economic benefits;

the cost of the asset can be measured reliably.

Tangible fixed assets (fixed assets): Non-monetary assets that have tangible form, including real estate (land, buildings, structures and other objects related to land), machinery and equipment, which are used subject to the production or supply of goods and services for renting to other entities, or for administrative purposes and to be used for more than one year.

The basis for drawing up the balance of fixed assets and the calculation of its indicators is a variety of information material.

Thus, data on fixed assets of large and medium-sized commercial organizations, as well as fixed assets of non-profit organizations are given according to the statistical form «Statement of fixed assets» (code 11, annual periodicity), data on fixed assets of small enterprises engaged in entrepreneurial activity - according to data of the statistical form «Report on the activity of small enterprises» (index 2-MP, annual periodicity), data on the fixed assets of individuals used for the production of products and services - according to a sample survey of peasant (farm) enterprises.

Results of the indexations conducted (revaluations), during which the value of fixed assets brought in line with current prices in the reporting period, and considered in the original and carrying (deduction of depreciation) value of fixed assets in accordance with the acting regulations.

The original value - is the value actually incurred costs for the construction and acquisition of fixed assets, including paid, non-refundable taxes and fees, as well as the costs of delivery, installation, commissioning and

any other costs directly attributable to bringing the asset to a working condition for its intended use, as well as the value of fixed assets at current market prices on a specific date.

Carrying value - is the amount at which an asset is recognized in the balance after deducting accumulated depreciation of the entire asset.

Building: The facility, built for permanent purposes, consisting of bearing and protecting or combined (bearing and protecting) constructions intended to stay, stay of people or animals, the storage of objects, depending on the functional purpose of the object.

Construction: Engineering construction object (other than a building), the purpose of which is to create the conditions necessary for the implementation of the production process by making certain technical functions that are not associated with a change in the subject of work or to perform a variety of non-production functions.

Machinery and equipment: A device that converts the energy, materials and information. Depending on the main (dominant) purpose, machinery and equipment are divided into different categories.

Coefficient of liquidation (disposal) of fixed assets characterizes the reproduction of fixed assets. Defined as the ratio of disposed fixed assets for the year to their availability at the beginning of the year.

Coefficient of renewal of fixed assets reflects the share of the newly introduced fixed assets in their availability for the end of the year.

Depreciation of fixed assets - is the systematic allocation of costs on the amortized cost of the asset during its estimated useful life.

Depreciation degree - the ratio of depreciation of fixed assets to the original cost of fixed assets.

Intangible fixed assets (intangible assets): Non-monetary assets without physical nature, are intended for use over a long period (more than one year) in the production or sale of goods (works, services), for administrative purposes and leasing of other entities that :

- can be determined;
- can be controlled by entity;
- the use of which the subject expects to receive economic benefits in the future.
