## Brief methodological explanations

Investments in fixed assets - investments in order to obtain investors of economic, social or environmental effect in the case of new construction, expansion, as well as reconstruction and modernization of facilities, which lead to an increase in the initial value of the object, as well as the purchase of machines, equipment, vehicles, on the formation of the main herd, perennial plants, etc.

Investments in tangible fixed assets - costs in residential buildings, other buildings, structures, machinery, equipment, vehicles, cultivated biological resources.

Investments in intangible fixed assets - the costs of objects created or acquired by organizations, are used in economic activity for more than one year, having a monetary value, with the ability of alienation and generating income, but not being tangible values.

The index of physical volume (hereinafter - IPV) of investments in fixed assets characterizes the change in investments in the dynamics and is determined by the ratio of the volume of investments in fixed capital in the reporting and the compared period in comparable prices.

The calculation of IPV of investments in fixed assets for 2017 is carried out in accordance with the Methodology for the formation of investment performance indicators approved by the Order of the Chairman of the Committee on Statistics of the Ministry of National Economy of the Republic of Kazakhstan of December 2, 2016 No. 296, registered in the Ministry of Justice of the Republic of Kazakhstan on December 27, 2016 No. 14601.

Investments aimed at protecting the environment - costs aimed at protecting the environment and rational use of natural resources: the cost of carrying out activities for commissioning and reconstruction of wastewater treatment facilities; the cost of carrying out activities for the commissioning of facilities for cleaning household and storm drains; costs of measures to improve the condition of surface water sources; the cost of carrying out measures for the protection of land resources; the cost of carrying out activities for the creation of specially protected natural areas and other costs.

Domestic investments are investments of own or borrowed capital by investors of a given country (residents) in newly created or existing fixed assets within the country.

foreign - investments of foreign capital owned by foreign investors in newly created or existing fixed assets located in the territory of the Republic of Kazakhstan.

Investments in construction include: construction costs of all kinds; the cost of installation of equipment for the purchase of equipment that requires and does not require installation,

provided for in the estimates for construction; for the purchase of production tools and household equipment included in the construction estimates; for other capital works and costs associated with construction.

Investment in housing - the cost of building individual and multi-family residential buildings, dormitories, residential buildings for social groups.

The composition of the commissioned fixed assets includes the cost of completed construction and commissioned enterprises, buildings and structures for production and non-production purposes; the cost of machinery, equipment, vehicles of all kinds (requiring and not requiring installation, included and not included in the estimates for construction); the cost of tools, inventory and other items credited to fixed assets; the cost of perennial plantations (orchards, vineyards, etc.) and working and productive livestock; capital costs for land improvement and other costs associated with an increase in the value of fixed assets.

Construction activities - the creation of new buildings and structures, other construction projects, as well as expansion, reconstruction of existing buildings and structures.

The volume of construction work includes the cost of construction work performed by enterprises engaged in construction activities under construction contracts.

Classification units of the type of activity "Construction" is an enterprise, depending on the nature of the main and secondary types of economic activity, one of the groupings of the General Classifier of types of economic activity (hereinafter referred to as GCTEA) sections 41-43 of section F.

Buildings include an artificial structure consisting of supporting and enclosing structures that form a compulsory ground-enclosed volume, depending on the functionality used for living or staying people, performing production processes, as well as placing and storing material values. The building may have an underground part.

The total area of a residential building (residential building) is the sum of the useful areas of all residential premises and the areas of all non-residential premises, as well as the areas of parts of a residential building that are common property.

The indicator "Average actual construction costs for 1 square meter of the total area of residential buildings (without specialized and other residential buildings)" determines the actual capital costs incurred by developers and is calculated by dividing the actual cost of construction (thousand tenge) by the total area of residential buildings (square meters).
