3. Glossary

A household is an economic entity consisting of one or more individuals living together, pooling all or part of their income and property, and consuming goods and services in common.

Household production - the value of goods, products and services resulting from the production activities of households in the reporting period, intended both for own consumption and for sale.

The production of goods, products and services is accounted for in kind and value terms at sales prices.

4. Methodological explanations

Data on the survey of population budgets by standard of living are formed on a quarterly and annual basis, based on a survey of 12,000 households, in accordance with the Methodology for Organizing and conducting a sample survey of households by standard of Living approved by Order No. 31 of the Chairman of the Statistics Committee of the Ministry of National Economy of the Republic of Kazakhstan dated July 2, (2020, registered with the Ministry Justice of the Republic of Kazakhstan No. 20922), July 3, 2020, with Methodology for constructing a sample of households for a survey of living standards, approved by Order of the Head of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan dated December 20, 2023 No. 237

The purpose of the observation is to obtain information on the production of consumer goods in households, household expenditures on land, on the maintenance of farm animals, income from the sale of agricultural products and the provision of services by households of the republic.

Quarterly and annual results are presented based on the results of a sample survey of households with the distribution of the data obtained to the general population for the republic and by region.
