3. Glossary

The volume of services rendered is the cost of services rendered by healthcare organizations, in the amount of funds received from enterprises, organizations and (or) directly from the population (households) in payment for the services rendered to them and are estimated as the income of the organization, which, in turn, is estimated at the cost of sales received or due to be received.

The main activity is the type of activity whose added value exceeds the added value of any other type of activity carried out by the economic entity.

Assets, resources controlled by an individual entrepreneur or organization as a result of past events, from which the following economic benefits are expected to be received.

Income is an increase in economic benefits during the reporting period in the form of an inflow or increase in assets or a decrease in liabilities that result in an increase in capital other than the increase associated with contributions from persons participating in the capital

Fixed assets are tangible assets that are held by an entity for use in the production or supply of goods (works, services), for leasing to other persons, for value increase or for administrative purposes, the use of which is expected to last more than one period.

Expenses are a decrease in economic benefits during the reporting period in the form of an outflow or decrease in assets or the occurrence of liabilities that result in a decrease in capital other than the decrease associated with distributions to persons participating in the capital.

4. Methodological explanations

The presented statistical tables provide data on the financial and economic activities of organizations with primary activities in the healthcare sector.
