3. Glossary

Investments in fixed capital - investments in order for investors to obtain an economic, social or environmental effect in the case of new construction, as well as expansion, reconstruction and modernization of facilities (which lead to an increase in the initial cost of the facility), the purchase of machinery, equipment, vehicles, for the formation of the main herd, perennial plantings, etc.

The costs of construction and installation works and capital repairs include the costs of a complex of works on the construction of buildings and structures, expansion, reconstruction, installation of energy, technological and other equipment, as well as the costs of capital repairs of non-residential, residential buildings and structures.

The cost of purchasing machinery and equipment - an element of the technological structure of investments, including the cost of purchasing machinery, vehicles, equipment.

Other costs in the volume of investments in fixed capital – the costs of design and survey work, supervision, maintenance of directorates of objects under construction, the costs of cultivated biological costs, as well as the costs of objects created or acquired by organizations used in economic activity for more than one year, having a monetary valuation, having the ability to alienate and generating income, but which are not material values.

The index of the physical volume of investments in fixed capital characterizes the change in investment investments in dynamics, is determined by the ratio of the volume of investments in fixed capital in the reporting and compared period at comparable prices

4. Methodological explanations

Statistical information on investments in fixed capital is formed on the basis of primary statistical data of national statistical observations of economic entities engaged in investment activities (regardless of the number of employees and type of economic activity) and national statistical observations on the commissioning of facilities by individual developers.

Accounting of investment investments is provided at the place of actual implementation, regardless of the place of registration of the economic entity engaged in investment activities.

Operational data on investments in fixed capital, formed on a monthly basis, are updated with annual data.

By types of economic activity, data on investments in fixed capital are formed according to the direction of use (depends on the nature of the direction of investment (end use) and by the type of economic activity of the investor.
