1. Key points

The Gross Domestic Product by final expenditure method for January-December 2025 amounted to 155236223,7 million tenge.

GDP increased by 6,5% in real terms compared to the corresponding period last year.

GDP by production method for January-December 2025 amounted to 159583750,7 million tenge.

The statistical discrepancy between GDP methods of production and the expenditure was 4347527 million tenge or 2,7% of GDP.

2. GDP by use components

GDP by final use method for January-December 2025

	At current prices, million tenge	To the previous year, in percent		In percentages to the end
		IPV	deflator	
Final consumption expenditure	105 045 369,9	107,3	110,9	67,7
households	88 162 257,5	108,1	111,4	56,8
general government bodies	16 498 041,7	103,4	108,2	10,7
for individual goods and services	8 500 990,2	100,2	107,5	5,5
for collective services	7 997 051,5	107,0	108,9	5,2
non-profit organizations serving households	385 070,7	105,5	112,4	0,2
Gross capital formation	45 016 860,6	112,2	107,2	29,0
gross fixed capital formation	39 170 101,3	110,4	106,0	25,2
change in inventories	5 846 759,3	-	115,6	3,8
Net export	5 173 993,2	-	-	3,3
export of goods and services	47 092 760,9	101,9	109,2	30,3
import of goods and services	41 918 767,7	109,0	110,8	27,0
Gross domestic product by end use method	155 236 223,7	106,5	109,3	100,0
Gross domestic product by production method	159 583 750,7	106,5	109,7	-
Statistical discrepancy*	4 347 527,0	-	-	-

*Statistical discrepancy is the difference between gross domestic product calculated by the production method and the expenditure method.

In the structure of GDP by use components for January-December 2025 and the share of expenditures on final consumption amounted to 67,7%, gross capital formation – 29%, net exports – 3,3%.

GDP structure by use components

in percentages

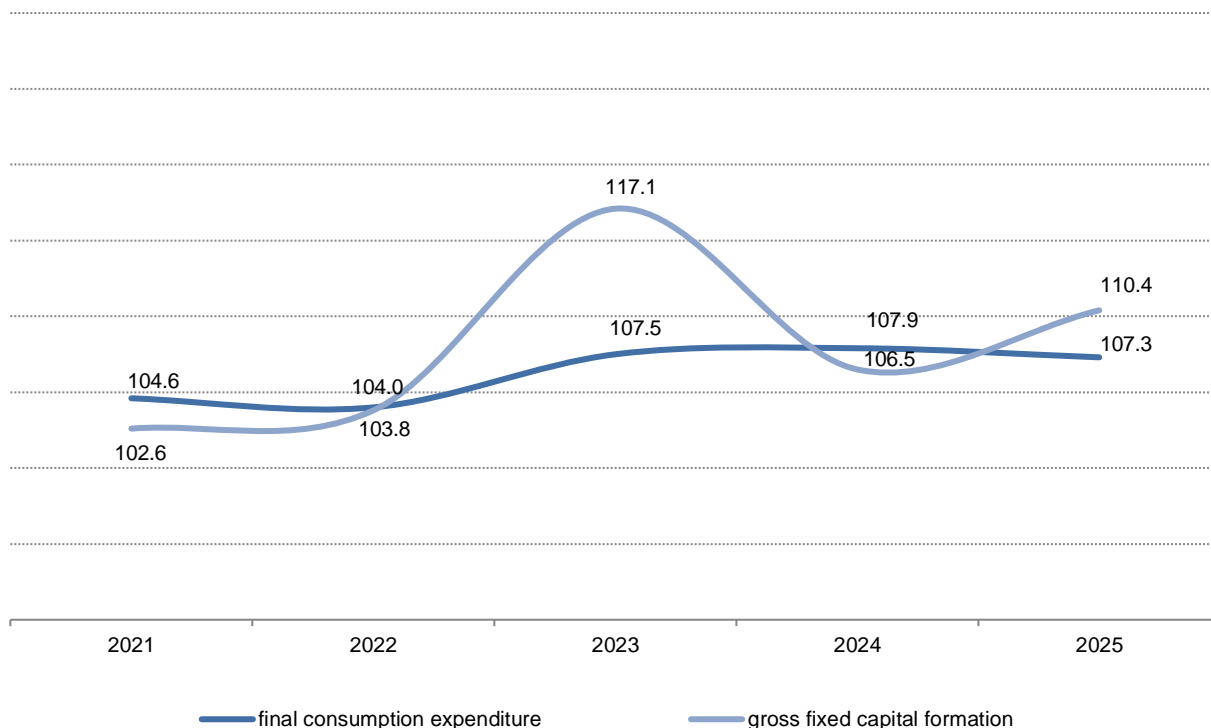

Compared to the corresponding period last year, in real terms there is an increase in the final consumption expenditure component by 7,3% due to an increase in household final consumption expenditure by 8,1%, general government bodies by 3,4% and non-profit organizations serving households by 5,5%.

Gross fixed capital formation in real terms amounted to 10,4% compared to the corresponding period last year.

3. Glossary

Gross domestic product (GDP) - one of the most important indicators of the system of national accounts, characterizing the final result of the country's economic activity.

Contribution - the value of the influence of the percentage change in the indicator on the total value of GDP.

Final consumption - the consumption of goods and services fully used by individual households or society as a whole to satisfy their individual or collective needs and requirements.

Gross capital formation - the total value of gross fixed capital formation, changes in inventories and acquisitions of valuables less their disposal.

4. Methodological notes

Gross domestic product calculated using the final use method is the sum of all economic sectors' expenditures on final consumption, gross capital formation and net exports.
