3. [Number of victims of work-related accidents, including fatalities \(by type of ownership\):](#)
4. [Distribution of the number of victims of occupational diseases \(by region\):](#)

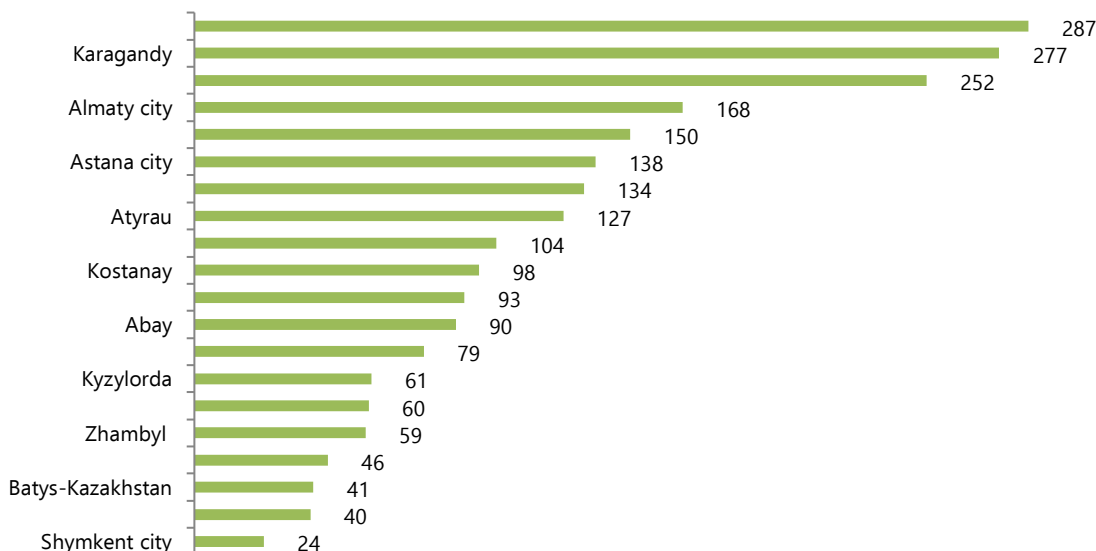

## 2. [Dynamics](#)

### Number of victims of work-related accidents, including fatalities

	Number of victims with disability for 1 working day or more, including those with a fatal outcome			people
	2023	2024	2025	
Total	2 670	2 471	2 328	2328
Large and medium enterprises	2 244	2 100	1 941	1941
Small enterprises	426	371	387	387

### Number of victims of work-related accidents

people

The highest rate of injuries remains in the Shygyz Kazakhstan. In the region in 2025, 287 cases were recorded in this region, which is 12.3% of the total number of cases. Karaganda region is in second place, where 277 people (11.9% of the total number of cases) were injured in the workplace.

### 3. Methodological explanations

The spreadsheets show includes data submitted by all legal entities of all forms of ownership and in which an accident or occupational disease is registered.

The unit of measurement is the case of an occupational injury, that is, data on one person who was injured during one accident at work.

### 4. Glossary

Accident at work - the impact on the employee of a production factor in the performance of labor (service) duties or tasks of the employer, as a result of which an injury, a sudden deterioration in health or poisoning of the employee occurred, which led him to temporary or permanent disability, occupational disease, or death.

The number of victims with loss of ability to work and death - victims are taken into account in case of accidents that occurred on the territory of the enterprise when the victim was performing work duties, as well as when going to work or from work on the transport provided by the enterprise.

Occupational disease - a chronic or acute disease caused by exposure of an employee to harmful production factors in connection with the performance of his labor (service) duties.

The material consequences of accidents at work are determined by the amount of compensation for damage to the injured employee, which is calculated as a percentage of his earnings in accordance with the degree of loss of his professional ability to work. Persons entitled to compensation for damages in the event of the death of the breadwinner shall be compensated for damages in the amount of the average monthly earnings of the breadwinner minus the share attributable to himself and able-bodied persons who are dependent on him, but who are not entitled to compensation for damages.
