LSSRPGO of RK - Legal Statistics and Special Accounts Committee of the General Prosecutor's Office of the Republic of Kazakhstan.

Law enforcement body - a state body that ensures the observance and protection of the rights and freedoms of man and citizen, the legitimate interests of individuals and legal entities, the state, implements the state policy on combating crime and other offenses in accordance with its competence, endowed with special powers to ensure the rule of law and maintain public order, detection, prevention, suppression, investigation of offenses, execution of court decisions in criminal cases.

A crime - a guilty socially dangerous act (action or inaction) prohibited by the criminal legislation of the Republic of Kazakhstan under the threat of punishment in the form of a fine, correctional labor, involvement in public works, restriction of freedom and imprisonment.

4. Methodological explanations

This publication presents the results of a sample survey "The level of public confidence in law enforcement agencies and the judicial system".

The survey involved 18 005 randomly selected households, or 0.35% of the total number of households in the country. In the sample survey, one household member aged 15-80 years.

The purpose of the survey is to obtain representative data on the level of public confidence in law enforcement agencies, on the perception of their own safety and subjective assessment of the level of crime, as well as obtaining information about offenses.

The survey is carried out by questioning the population and recording information in a statistical form. The survey is carried out by conducting interviews by specially trained interviewers by visiting households.

The statistical form of the survey contains the following sections:

- information about the respondent;
- perception of one's own safety and subjective assessment of the level of crime;

Survey indicators are given for the entire population.

In some cases, minor discrepancies between the total and the sum of terms are explained by automatic rounding of data.
