*Since January 1. 2026. the Bureau of National Statistics. as part of the Household Budget Survey. has implemented the transition to the updated 2018 version of the international Classification of Individual Consumption According to Purpose (COICOP). with a five-digit level of detail.

Due to the introduction of the updated classification, changes have been made to the structure of the aggregation of household expenditures. In particular, expenditure on food consumed away from home has been reclassified under the updated COICOP as expenditure on paid services, whereas previously it was included under expenditure on food products.

3. Glossary

Monetary expenses include consumer expenses, financial assistance to relatives and friends, alimony, taxes, payments and other payments, repayment of loans and debt.

Consumer spending is a part of household monetary expenditures aimed at purchasing consumer goods and services. Consumer spending includes spending on the purchase of food products, non-food products and paid services.

Cash income includes income from employment, social transfers and other cash receipts.

The income of the population used for consumption includes consumer expenditures (without investments in production activities and accumulation) and the cost (in monetary terms) of in-kind products of own production and transfers consumed.

4. Methodological explanations

Data on the survey of population budgets by standard of living are formed on a quarterly and annual basis, based on a survey of 12,000 households, in accordance with the Methodology for constructing a sample of households for a survey of living standards, approved by Order of the Head of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan dated December 20, 2023 No. 237

5. Spreadsheets:
