Proportion of women in state, quasi-government and corporate sectors at the level of decision making, percent												
Proportion of women in leadership positions (includes all sectors), percent	-	-	37,3	37,0	41,2	43,0	41,1	39,0	40,8	41,2	41,3	40,6
Proportion of women in leadership positions in the public sector	-	-	46,1	45,2	45,5	44,5	46,4	46,2	45,6	44,4	45,4	46,8
Proportion of women in leadership positions in the quasi-public sector, percent	-	-	-	-	-	-	-	46,4	48,3	47,3	46,8	46,7
Proportion of women in leadership positions in the corporate (private) sector	-	-	36,2	38,5	39,0	39,6	39,5	38,0	39,9	39,8	39,6	40,1

* Indicators are calculated according to the Methodology for calculating gender statistical indicators approved by the order of the Head of the Bureau of national statistics of the Agency for strategic planning and reforms of the Republic of Kazakhstan dated December 28, 2022 №42.

2. Integrated human development index

Gross domestic product at the production stage is determined by summing up the gross value added by sectors. Gross domestic product is calculated at market prices, i.e. includes net taxes on products and imports. It is one of the most important indicators of the system of national accounts characterizing the final result of economic activity of the country.

* While changing into US dollars average annual exchange rate is applied according to the rate of National Bank of Kazakhstan.

3. Demographic characteristics

This section contains statistical data on the size of the population split by women and men, number of births, deaths including causes of death, population distribution by marital status and education level.

In the section, there are also some other figures that overview demographic indicators on general reproductive process - life expectancy at birth, total fertility rate.

Natural population growth - the difference between the number of live births and the number of deaths over a certain period. Vital data is collected and processed on the basis of civil registration records registered with the Civil Registry Office. Births include only those born alive.

Live birth – is a complete expulsion or extraction from its mother of a product of conception, irrespective duration of pregnancy, after such separation the foetus can breath and show other signs of a life, such as heartbeat, the pulsation of an umbilical cord or obvious movements of voluntary muscles of whether or not the umbilical cord has been cut or the placenta is attached.

Life expectancy at birth is a number of years that one person will live on average, provided that throughout the lifetime of this generation, the rate of mortality at each age remains the same as during years when the indicator was calculated.

Age-specific fertility rates is calculated as a ratio of delivered women of given age group per year to mid-annual number of women of this age.

The summary birth rate indicates the average number of children that can be delivered by women during the entire reproductive period keeping the birth rate at every age the same as for the year the coefficient is being calculated. Its magnitude does not depend on the population age group and is characteristic of the average birth rate in a given calendar year.

Reproductive period (age) - time period during which the woman is capable to a child-bearing. For the statistical purposes 15-49 years are conditionally accepted period in the majority of the countries.

The mortality rate for death causes is calculated as a ratio of death rate by shown causes divided by mid-year population estimates (calculated per 100000 person of the relative gender).

Maternal mortality is a number of female deaths caused by pregnancy complications, delivery and post-natal period complications per 100000 live-born children.

Infant mortality – number of children's death aged less than 1 year per 1000 born.

Migration of population - the movement of person (migrants) across the borders of different regions with a change of residence. The number of arrivals and departures is determined as a result of the development of data on registration and deregistration for permanent residence, received from the Committee of the Migration Service of the Ministry of Internal Affairs.

In the current statistical record is now tentatively fixed number of arriving and departing person, in reality we are talking about the numbers of arrivals and departures.

3.1 Population by gender

as of January 1, 2026, thousand persons

	Total population	Of them		As percent of total population		Women per 1000 men
		women	men	women	men	
2022	19 503,2	9 989,4	9 513,8	51,21	48,78	1 050
2023	19 766,8	10 119,1	9 647,7	51,19	48,81	1 049
2024	20 033,8	10 250,0	9 783,8	51,16	48,83	1 048
2025	20 283,4	10 372,6	9 910,8	51,14	48,86	1 047
2026	20 499,8	10 479,1	10 020,7	51,12	48,88	1 046

Gender-age structure of the population of Kazakhstan

as of January 1, 2026, thousand persons

4. Social characteristics

The section contains statistical data about distribution of time budget by the population, number of persons with disabilities, pensioners, the state transfers recipients, social welfare centers.

Household is an economic entity consisting of one or more individuals living together, combining all or part of their income and property and jointly consuming goods and services.

The income of the population used for consumption includes consumer expenses (without capital investments in production activities and accumulation) and the cost (in monetary terms) of in-kind products of its own production and transfers consumed.

The number of persons with disabilities characterizes a contingent of persons with disabilities registered in the bodies of Health and Social Development regardless of the time certifying them as the persons with disabilities.

The pension beneficiaries - the number of person for the end (beginning) of the reporting year, who is assigned a monthly sum provided by the pensions legislation. The total number of pensioners are calculated on the individual accounts of pensioner registered in social security agencies.

Minimum pension size is established by the Law on the Governmental budget for the financial year minimum cash payment guaranteed by the state under the conditions provided by the pension law.

The average monthly pension is calculated as a ratio of the total amount of monthly pensions, fixed for all pensioners registered at the bodies of Health and Social Development, to their recipients (end of year).

State targeted social assistance- payment in cash provided by the State to individuals (families) with a monthly average income poverty established in regions, cities of national significance, capital.

In accordance with the Law of the Republic of Kazakhstan «On state targeted social assistance», citizens of the Republic of Kazakhstan, repatriate, persons having refugee status, foreigners and stateless persons who have residence permits and permanent residence in the Republic of Kazakhstan with average income poverty, have a right for the social assistance.

State targeted social assistance is not appointed to the unemployed not registered in public employment centers except persons with disabilities, person hospitalized more than a month, pupils and students, students of full-time education, including graduate and postgraduate, and as well as the citizens taking care of persons with disabilities of I and II groups, persons over eighty years, children under seven years.

Educational orphanage provide care and education of children of preschool and school age mainly at the expense of the state. There are orphanages of the general type, family type orphanages, boarding schools for orphans, children with disabilities, the general and health camp-type boarding schools.

Residential care facility (adults and children) - medical and social institutions for permanent residence of the elderly and persons with disabilities in need of everyday and health care.

6. Education and science

This section contains information about the level of literacy of the population, the level and accessibility of education the distribution of trained women and men by type of educational institutions as well as by groups of specialties. The section also includes the main indicators in the fields of science information on the number of person with an academic degree the level of computer literacy and many others.

The educational institutions includes schools, upper secondary school and lyceum implementing primary and secondary education programs. Upper secondary school provide an extended profiled differentiated education, lyceum focuses on vocationally-oriented education of the senior students.

Providing (coverage) of children with permanent pre-primary school. The index is defined as the ratio of the number of children attending pre-primary school and the number of children aged 1-6 according to demography statistics to the adjusted number of school children aged 5-6 years.

Provision of vacancy for children in pre-primary school (children per 100 vacancies) is the ratio of children in preschool to the number of vacancies in them. The result is multiplied by 100.

Overall coverage rate. The number of students enrolled at this level of education in educational institutions regardless of age, expressed as a percentage ratio to the theoretical age group population at this level.

Net coverage rate. Number of pupils of theoretical age group at this education level, as a percent ratio to overall population of this age group.

Training of high-qualified research and teaching personnel is carried out by research centers and higher education institutions with master's degree, postgraduate and/or doctoral studies.

Master (post-graduate, doctoral) - is the main form of training for high-qualified research and teaching personnel-masters, candidates (doctors) of sciences on the most important areas of science and technology, PhD (PhD).

Research and development - research activity which is carried out on a systematic basis in order to improve scientific knowledge and to find the new areas of its practical application.

R & D structure includes fundamental, applied research and technological development. It is classified by type of work as fundamental, applied research, development.

R & D personnel - a set of individuals whose creative work, undertaken on a systematic basis, aimed to improve scientific knowledge and to find then few fields of application of that knowledge, as well as employees providing direct R & D services. R & D personnel is recorded as a payroll of institution (of relevant departments of higher educational institutions, industrial enterprises and others) engaged in research and development.

There are four categories of R&D personnel: researchers, technicians, support staff and other personnel.

7. Employment and unemployment

This section contains information on the headline indicators of the labor market, the number of employed population by employment status and economic activities as well as employees working under hazardous and dangerous conditions, the distribution of the unemployed by age and education. Data on average nominal monthly wage.

Labour force - part of the population at the age specified for measuring the labour force, ensuring the supply of labour for the production of goods and services. Labor force includes employed in all types of economic activities and the unemployed.

The labour force participation rate - the proportion of the labour force in the total population aged 15 years and above, measured in percentage.

Employment rate – all individuals at the certain age, who according to their status during the short defined period equal to one week, could be referred to one of the categories:

- a) employee;
- b) self-employed worker.

A person who was on holiday (labor, without pay, maternity or child care) in the survey week, or ill, is also considered employed because he has a formal attachment to his work.

Employees - persons working under a labor contract providing the payment (remuneration) in the form of salary, bonuses, allowances, etc.. or in kind.

Self-employment is employment, in which the amount of remuneration directly depends on the income received from the production (sale) of goods and services (where own consumption is considered as part of income).

Unemployed population - a person at the age specified for measuring the labour force, which in the reported period simultaneously meet three main criteria:

- a) were without work (did not have a profitable occupation).
- b) actively seeking for job.
- c) were ready to start a job for a certain period.

Unemployment rate - ratio of unemployed to the labor force participation rate, assessed in percentage.

Number of employees working under hazardous and dangerous work conditions includes workers who have at least one industry factor exceeding MAC (maximum allowed concentration of chemical substance and industrial dust) at their working places or MAL (maximum allowed level of element), identified by sanitary regulations.

Wages – remuneration of labour according to complication, quantity and quality.

Average nominal monthly wages of an employee are calculated by dividing the sum accrued by remuneration fund to the actual number of employees and number of months in the reporting period.

7.1 Headline indicators of labour-market

8. Small and medium enterprise

This section contains information about the number of registered and active small and medium enterprise including women-headed; employment size at small and medium enterprise by regions and economic activities. Data on ongoing activities of «Entrepreneurship Development Fund «Damu» JSC in financing the women entrepreneurs.

Summary of registered and active small and medium enterprises formed on the basis of the Business Statistical Register recoding data on legal entities, sole proprietorship and farm.

Legal entity – organisation. that has a separate property on the right of ownership, operation management and use the property for own liabilities. On own behalf appropriate and exercise property and personal nonproperty rights and liabilities, act as a plaintiff and defendant in a court. A legal entity shall act as an independent accounting entity.

Small business entities are individual entrepreneurs without the formation of a legal entity and legal entities engaged in entrepreneurship, with an average annual number of employees of no more than one hundred people and an average annual income of no more than three hundred thousand times the monthly calculation index established by the law on the republican budget and effective on January 1 of the corresponding financial year.

Subjects of medium-sized entrepreneurship are individual entrepreneurs and legal entities engaged in entrepreneurship that are not related to subjects of small and large entrepreneurship.

Sole proprietorship - initiative activity of individuals aimed at obtaining income based on the property of individuals themselves and carried out on behalf of individuals, at their risk and under their property liability. The state registration of sole proprietorship is carried out by the tax authorities.

Peasant farms are recognized as a family labor force association where sole proprietorship is exercised on the base of agricultural land use for agricultural production as well as the processing and marketing of these products.

9. Crime

This section contains data on different types of crime, on individuals who have committed crimes and were convicted and also information on number of registered crimes against women and juveniles.

The section uses the data of the Committee on Legal Statistics and Special Records of the General Prosecutor of the Republic of Kazakhstan.

Crime represents a social-legal phenomenon comprising crimes committed in a particular area for a certain period of time and having qualitative and quantitative indicators.

Registered crime - detected and officially registered as the socially-dangerous act for which the criminal law prescribes charge.

Number of convicted individuals includes the convicted by a final verdict that have come into the force.

Domestic violence – an intentional act (action or inaction) of a single person threatening or causing physical and (or) mental suffer in relation of one family member (s).

As part of the Law of the Republic of Kazakhstan «On Prevention of Domestic Violence», domestic violence can take the form of physical, psychological, genderual and (or) economic violence.

9.1 Offenders
