3. Glossary

Principal activity - a type of activity, the added value of which exceeds the added value of any other type of activity carried out by an economic entity.

Assets - resources controlled by an individual entrepreneur or organization as a result of past events from which the following economic benefits are expected to be received.

Income - an increase in economic benefits during an accounting period in the form of an inflow or increase in assets or a decrease in liabilities that results in an increase in equity, other than an increase associated with contributions from equity participants.

Fixed assets - tangible assets held by an entity for use in the production or supply of goods (works, services), for leasing to other persons, for value addition or for administrative purposes, the use of which is expected for more than one period.

Expenses - decreases in economic benefits during an accounting period in the form of an outflow or decrease of assets or incurrence of liabilities that result in a decrease in equity, other than a decrease related to distributions to equity participants.

4. Methodological explanations

The statistical bulletin presents statistical data of organizations with the main type of activity in the field of healthcare of all forms of ownership, departmental affiliation and size of enterprises providing financial and economic activities of healthcare organizations

The volume of services rendered in the field of health care and the provision of social services in the Republic of Kazakhstan, as well as the volume of services performed at the expense of budgetary funds and enterprise funds, is reflected without value added tax.

The volume of services paid by the population is indicated in the amount of the amounts actually paid (ie, including VAT).
