Income from sales of products and services	41 739,0	57 646,6	65 969,4
Cost of goods sold and services rendered	29 757,1	40 259,1	43 906,5
Gross profit	11 981,6	17 387,5	22 062,9

2 . Methodological notes

The volume of products manufactured, works performed and services rendered is the cost of all products manufactured and services rendered at producer prices.

Income from the sale of products and the provision of services - the amount of income received and receivable minus value added tax, excises, as well as the cost of returned goods, sales discounts and price discounts presented to the buyer.

The cost of goods sold and services rendered is the actual cost of sold (shipped) finished products (works, services).

Non-manufacturing expenses are expenses of the period, which include expenses for the sale of products and services, administrative expenses, financing expenses.

Profit (loss) before tax - the financial result from the sale of products (goods, services), which is defined as the difference between the income from the sale of products (goods, services) and the cost of sales of products (goods, services), as well as expenses not included in the cost products (goods, services).

The profitability of enterprises characterizes the efficiency of their activities, is calculated as the ratio of profit (loss) before taxation to the costs of production and sale of products (works, services), taking into account the expenses of the period.

Indebtedness under obligations - funds temporarily attracted by the enterprise and subject to return to the relevant legal entities and individuals. Accounts payable are unfulfilled payments for shipped goods, unpaid taxes, unpaid accrued wages.

Overdue debt - the amount of overdue debt, including the carry-over balances of debt from the previous period and outstanding at the reporting date.
