Methodological notes

Youth - citizens of the Republic of Kazakhstan aged 14-28 years in accordance with the Law of the Republic of Kazakhstan dated February 9, 2015 No. 285-V "On State Youth Policy".

Current estimates at the beginning of the year are calculated on the basis of the results of the last population census. to which the number of births and arrivals to a given territory is added annually and from which the number of deaths and those who left the given territory are subtracted. Current estimates of the population size over the past years are updated based on the results of the next census. Calculations of the number of young people are made for Kazakhstan as a whole and its individual administrative-territorial units.

The number of young people is divided into urban and rural populations.

Urban population - the population living in urban settlements. Urban settlements include cities of republican, regional and district significance as well as villages located on the territory of their administrative subordination.

Rural population - the population living in rural areas. Localities that are not classified as urban are considered rural.

Age-specific fertility rates are calculated as the ratio of the number of births per year among women of a given age group to the average annual number of women of this age. When calculating the coefficient for the age group up to 20 years old, the number of women aged 15-19 years old was taken as the denominator. When calculating the coefficient for the age group 15-49 years old, the numerator includes all borns, including those born to mothers under the age of 15 years old and 50 years old and older.

Information about marriages and divorces (dissolved marriages) is obtained on the basis of the annual statistical development of data contained in civil status acts compiled for each such event by the RAGS bodies. The data in the tables cover only cases of marriage and divorce registered with the Civil Registry Office.

The age of those who got married was calculated as the time interval between the date of marriage registration and the date of birth. The legal age for marriage in Kazakhstan is 18 years old for men and women. Local governments have the right at the request of persons wishing to marry to allow persons who have reached the age of 16 years old to marry.

The date of marriage is considered the date of its registration with the Civil Registry Office. A marriage is considered dissolved from the moment of registration of its dissolution (from the moment of divorce).

Information about deaths is obtained on the basis of the annual statistical development of the data contained in the acts of civil status on death, compiled by the Civil Registry Office.

Registration of death is carried out at the place of the last permanent residence of deceased or at the place of death on the basis of a medical certificate of death.

Age-specific mortality rates are calculated as the ratio of the number of deaths at a given age during a calendar year to the average annual number of persons of a given age. Similarly, mortality rates by causes of death are calculated as the ratio of the number of deaths from the specified causes of death to the average annual population.

Population migration - the movement of people (migrants) across the borders of certain regions with a change of residence. The number of persons arriving and departing is determined as a result of the development of information on registration for permanent residence received from the Ministry of Internal Affairs of the Republic of Kazakhstan.

Labor force - employed and unemployed population.

The share of the labor force in the population is the share of the labor force in the total population aged 15 years and older, measured as a percentage.

An employed person is an individual who carries out activities for payment or by extracting income through the use of property, the production and sale of goods, the performance of works, the provision of services.

The employment rate of the population is the share of the number of people employed in the economy in the total population aged 15 years and older, or in the labor force, measured as a percentage.
