1. Information about the indicator	
Goal	Promoting sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all
Task	By 2030, ensure full and productive employment and decent work for all women and men, including young people and people with disabilities, and equal pay for work of equal value.
The indicator	Unemployment rate by gender, age
2. Information about the organization	
Organization	Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The indicator is defined as the ratio of the number of unemployed to the total workforce, measured as a percentage.
Basic concepts:	The labor force is the employed and unemployed population. An unemployed person is an individual who is looking for a job and is ready to start work.
Justification and interpretation	According to the standards and criteria of the International Labour Organization, the unemployed include persons at the age set for measuring the workforce (15 years and older) who simultaneously met three main criteria during the period under review: – were out of work (did not have a profitable occupation); – were actively engaged in her search; – We were ready to start work within a certain period of time.
4. Data sources and collection methods	
Data sources	The source is the statistical data of the T-001 form "Questionnaire of the sample survey of employment of the population".
Data collection methods	Household members aged 15 years and older are being interviewed.
Unit of measure ment	Percent
Periodicity	Quarterly, annual
5. Calculation method and other methodological considerations	
Calculation method:	The indicator is calculated as the ratio of the number of unemployed interviewed in the current year divided by the total number of workers interviewed in the current year, measured as a percentage.
Comments and restrictions:	The indicators are formed at the regional level.
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the website of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan.
The level of disaggregation:	The data is disaggregated by gender, age, type of locality, level of education, occupation classification, and KATO

7. Comparability with international data/standards	The indicators are based on the results of a sample survey of an expanded network of households (4.8% of the total number of households), the frequency of the survey is once a year. Household lists are formed on the basis of the Housing Register of the Republic of Kazakhstan. The concepts and definitions are given in accordance with the standards and methodological approaches of the International Labour Organization (ILO).
