Picture 1. Physical volume index by industry Trade, in % to the corresponding period of the previous year

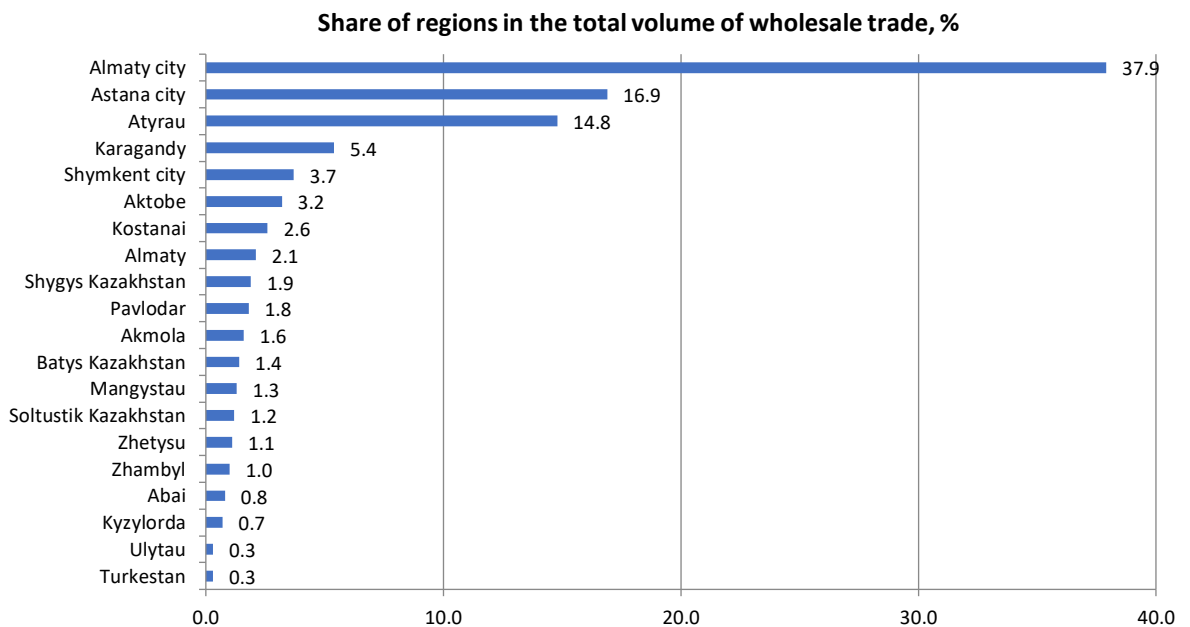

Picture 2. Index of physical volume of retail and wholesale trade, in % to the corresponding period of the previous year

The volume of wholesale trade in January-December 2023 amounted to 41769.4 billion tenge, or 112.8% compared to the corresponding period in 2022. Non-food products and industrial and technical products (82.7%) dominate in the structure of wholesale trade.

The largest share in the total wholesale trade of the republic in January-December 2023 falls on Almaty city (37.9%), Astana city (16.9%), Atyrau region (14.8%), Karaganda region (5.4%).

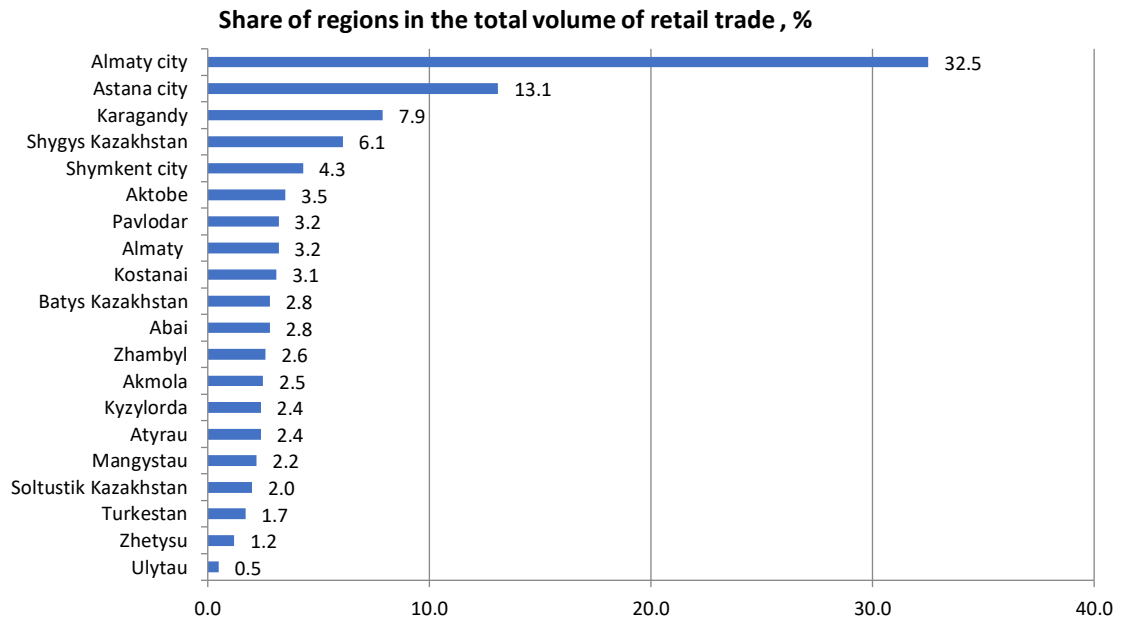

The volume of retail trade in January-December 2023 amounted to 19234.2 billion tenge, which is 7.7% more than the level of the corresponding period in 2022. Retail sales of good increased by trading enterprises to 12.1%, by individual entrepreneurs, including those trading in markets, decreased by 0.4% compared to January-December 2022.

From the beginning of the year, the turnover from the retail sale of goods by enterprises of private ownership received in the amount of 17367.8 billion tenge (90.3% of the total volume of retail trade), foreign ownership – 1866.5 billion tenge (9.7%).

As of January 1, 2024, the volume of commodity stocks of trading enterprises (for reporting enterprises) in retail trade amounted to 1521 billion tenge, in trading days - 61 days.

The share of food products in the total volume of retail trade is 32.7%, non-food products - 67.3%. The volume of sales of food products compared with January-December 2022 decreased by 3.4%, non-food products increased by 14%.

The largest share in the total retail trade of the republic in January-December 2023 falls on Almaty city (32.5%), Astana city (13.1%), Karaganda city (7.9%) and Shygyz Kazakhstan region (6.1%).

3. Glossary

Retail trade - resale (sale without processing) of new and used goods to the public for personal consumption, home use or disposal.

Wholesale trade - resale (sale without processing) of new and used goods to retailers, industrial, commercial, institutional or professional users or other wholesalers, as well as persons acting as agents or brokers when purchasing goods on behalf of such persons or companies or selling goods to them.

Index of the physical volume - a relative indicator that characterizes the change in the volume of sales of commodity mass (quantitative factor of commodity turnover) in the current period compared to the base one.

Commodity stocks - the amount of goods in cash or in kind, located in trading enterprises, in warehouses, in transit on a certain date.

4. Methodological explanation

The volume of sales of goods and services characterizes the amount of cash proceeds received for the sold goods, products and services rendered for cash and non-cash payments.

The index of the physical volume of turnover shows how the turnover changes as a result of changes only in its physical volume, excluding the influence of price changes.

To calculate the index of the physical volume of sales of goods (services), the turnovers of the reporting and base periods are compared in the prices of the same period taken as the base period (in constant prices).
