## 2. Contribution to the annual rate of inflation

The largest contribution to the annual inflation rate was made by food and non-alcoholic drinks (4.4 percentage point), housing services (1.8 percentage points), healthcare (1.4 percentage points).

## Contribution of the main groups of goods to the inflation of the Republic of Kazakhstan

## Contribution of individual components to annual inflation in the Republic of Kazakhstan in July 2025

in percentages, increase

Goods and services	Rate of increase	Contribution to price growth
<b>Food products</b>	11,2	4,621
Bakery products and cereals	3,6	0,267
Meat and meat products	13,2	1,539
Milk products	8,2	0,349
Eggs	0,3	0,004
Oils and fats	20,3	0,495
Fruits and vegetables	19,4	1,028
Sugar	3,6	0,035
Soft drinks	12,2	0,247
<b>Non-food products</b>	9,5	2,835
Cloth	9,8	0,612
Shoes	11,6	0,356
Detergents	3,3	0,051
Petrol	5,8	0,283
Goods for personal use	6,6	0,207
<b>Paid services</b>	14,9	4,304
Housing services, water, electricity, gas and other fuels	15,7	1,774
payment for housing maintenance	11,9	0,064
rental of property	11,8	0,413
residential maintenance and repair	6,9	0,204
cold water	96,1	0,463
hot water	15,5	0,040
garbage removal	10,9	0,032
drainage	34,6	0,064
electricity	11,3	0,144
gas	15,9	0,141
gas, transported through distribution networks	15,5	0,115
liquefied	18,5	0,026
central heating	19,2	0,133
solid fuels	8,9	0,066
intercom	11,5	0,010

Over the month, the price level of non-food products increased by 0.8%, food products – by 0.7%, paid services – by 0.5%.

## Inflation for the month

in percentages, increase

	July			
	goods and services	food products	non-food products	paid services
2021	0,7	0,7	0,5	0,8
2022	1,1	1,0	1,5	0,8
2023	0,6	0,1	0,7	1,0
2024	0,7	0,2	0,7	1,6
2025	0,7	0,7	0,8	0,5

### 3. Glossary

Inflation - an indicator that characterizes the change in time of the average price level for a fixed list of goods and services purchased by the population for personal consumption.

Contribution - the amount of influence of the percentage change in the indicator on the overall value of inflation.

### 4. Methodological explanations

The consumer price index, which characterizes the level of inflation, reflects the change over time in the general level of prices for goods and services purchased by the population for personal consumption.

The calculation of the consumer price index is based on information obtained from two sources:

- data on price changes collected by their direct registration in specially selected for this purpose outlets and places of services;

- household survey materials regarding the structure of actual consumer spending of the population.

The collection of information on price changes is carried out in a selective circle of cities and regional centers, in all regional centers, in cities of republican significance and the capital. The choice of basic trade and service enterprises is carried out locally. Objects of all types of trade and paid services are selected so that the survey includes enterprises with different trading conditions and regularly selling goods (services) of mass demand.

The set of goods and services for monitoring consumer prices and calculating the CPI is a single sample for all regions of Kazakhstan. The list of goods and services contains 508 items, which representatively includes the most representative types that occupy the largest share in the consumption of the population.

The collection of information on prices is carried out directly at the places of sale of goods (services) by price registrars. Prices are fixed for goods paid on the day of the survey, including taxes, but excluding additional fees for their delivery.
