

1. Information about the indicator	
Goal	Building resilient infrastructure, promoting inclusive and sustainable industrialization and innovation
Task	Expand access to financial conditions, including low-cost loans, for small-scale industrial and other enterprises, especially in developing countries, and strengthen greater integration into value chains and markets
The indicator	The object of production of small and medium-sized enterprises in the manufacturing industry
2. Information about the organization	
Organization	Bureau of the Agency of National Statistics for Strategic Planning and Reforms of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The object of industrial production in value terms is the value of all finished products (products) produced by the enterprise, semi-finished products of its products (both from its own raw materials and from the customer's raw materials and materials) intended for sale on the side, to its capital construction and its non-industrial divisions, issued to its employees on account of remuneration, and as well as works and services of an industrial nature performed on orders.
Basic concepts:	<p>The object of industrial production in value terms as a whole and for its individual types of activity is defined as the sum of data on the object of industrial products, goods and services of an industrial nature produced by legal entities and large educated units, regardless of the form of Unity. The object of industrial production (goods and services rendered) is accounted for in terms of value in producer prices (excluding value added tax and excise taxes).</p> <p>The cost of industrial products is defined as the sum of the cost of finished products produced both from their own raw materials and from the raw materials and materials of the customer, the cost of semi-finished products of their products (excluding the cost of in-house turnover), the cost of industrial services provided on the side.</p> <p>The cost of products made from raw materials and the customer's materials is determined by the cost of the work (excluding the cost of giving raw materials and supplies). Works and conditions of industrial production are included in the object of industrial production at a higher cost, including the cost of office materials consumed in this case.</p>
Justification and interpretation	Since 2010, Kazakhstan has been gradually implementing a new industrial policy aimed at creating a high-performance and export-oriented manufacturing industry.

	The main objectives of the industrial policy are stable growth and competitiveness of the manufacturing sector by increasing labor productivity and increasing export-oriented production of goods and conditions with high added value.
4. Data sources and collection methods	
Data sources	Bureau of the Agency of National Statistics for Strategic Planning and Reforms of the Republic of Kazakhstan
Data collection methods	Indicators of the production facility of small and medium-sized enterprises in the manufacturing industry are formed on the basis of forms 1-P "Enterprise report on the production and shipment of products (goods, services)" (annual) and 01-IP (prom) "report on the production of industrial products (goods, services) by an individual enterprise" (annual).
Unit of measurement	billion tenge
Periodicity	Annual
5. Calculation method and other methodological considerations	
Calculation method:	The indicator is based on the activities of small and medium-sized enterprises in metallurgy, pharmaceuticals, building materials, chemical industry products, mechanical engineering, light industry) (GCEA, SGVD 24, 21, 02.06, 20, 02.05, 02.07)
Comments and restrictions:	
6. Data availability and disaggregation	
Data availability and gaps:	since 2018
The level of disaggregation:	across the Republic of Kazakhstan and regions by small, medium, and large enterprises
7. Comparability with international data/standards	
8. References and documentation	<p>The State program of industrial and innovative development of the Republic of Kazakhstan (Appendix to the statistical bulletin "the state program of industrial and innovative development of the Republic of Kazakhstan for 2020-2025").</p> <p>The data on the "object of production of industrial products (goods, services) in value terms" are published in the bulletin "Main indicators of industry of the Republic of Kazakhstan" on the website of the state statistics.</p>
