1. Information about the indicator	
Goal	Promoting sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all
Task	By 2020, significantly reduce the proportion of young people who do not work, study or acquire professional skills
The indicator	The proportion of young people (aged 15 to 35) who do not study, work or acquire professional skills
2. Information about the organization	
Organization	Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	The indicator is defined as the portion of youth who are not working, not engaged in education or vocational training, who are outside the education and employment system and are a potential source of the youth labor market, measured as a percentage.
Basic concepts:	NEET youth (NotinEducation, EmploymentorTraining) is a part of the youth who are not working, not engaged in education or vocational training, who are outside the education and employment system and are a potential source of the youth labor market.
Justification and interpretation	**The methodological basis for the formation of the indicator "Proportion of youth NEET" is the methodological document of the International Labour Organization (hereinafter – ILO), published on the ILO website "Indicators of decent work. Concepts and definitions" (www.ilo.org).**
4. Data sources and collection methods	
Data sources	The source is the statistical data of the T-001 form "Questionnaire of the sample survey of employment of the population".
Data collection methods	Household members aged 15 years and older are being interviewed.
Unit of measure ment	Percent
Periodicity	Quarterly, annual
5. Calculation method and other methodological considerations	
Calculation method:	The calculation of the indicator "Proportion of NEET youth" is carried out in accordance with the information provided in the ILO methodological document "Indicators of decent work. Concepts and definitions of the " formula: $$NEET(\%) = \frac{(UE + NEA) - NEAedu}{EA + NEA} * 100\%$$ UE – **the number of unemployed people aged 15-24**

	years; NEA – **the number of people outside the workforce aged 15-24 years;** NEAedu – the number of people who are not part of the workforce due to their studies (full-time) at the age of 15-24 years; EA is the number of the workforce aged 15-24 years.
Comments and restrictions:	The indicators are formed at the regional level.
6. Data availability and disaggregation	
Data availability and gaps:	The data is available on the website of the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan.
The level of disaggregation:	The data is disaggregated by gender, age, type of locality, level of education, occupation classification, and KATO.
7. Comparability with international data/standards	The indicators are based on the results of a sample survey of an expanded network of households (4.8% of the total number of households), the frequency of the survey is once a year. Household lists are formed on the basis of the Housing Register of the Republic of Kazakhstan. The concepts and definitions are given in accordance with the standards and methodological approaches of the International Labour Organization (ILO).
