1. Information about the indicator	
Goal	Reducing inequality within and between countries
Task	Improve the methods of regulation and monitoring of global financial markets and institutions and apply such methods more consistently
The indicator	Public debt to GDP ratio
2. Information about the organization	
Organization	Ministry of Finance of the Republic of Kazakhstan
3. Definitions and concepts	
Definition	Public debt to GDP ratio
Basic concepts:	Public debt is the amount of government loans received (disbursed) and outstanding on a certain date, as well as debt obligations on a certain date, attributed in accordance with the legislative acts of the Republic of Kazakhstan to the debt of the Government of the Republic of Kazakhstan, the National Bank of the Republic of Kazakhstan or decisions of maslikhats to the debt of local executive bodies, without regard to mutual claims. GDP is the gross domestic product for the reporting year.
Justification and interpretation	An indicator showing the level of debt security of a country.
4. Data sources and collection methods	
Data sources	The source is information on the state of the national debt of the Republic of Kazakhstan as of a certain date.
Data collection methods	Statistical data collection
Unit of measure ment	Percent
Periodicity	Annually
5. Calculation method and other methodological considerations	
Calculation method:	The indicator is calculated as the ratio of the amount of government debt to GDP multiplied by 100. When calculating the indicator, estimated, operational and preliminary GDP values are used before calculating the actual GDP value for the reporting year.
Comments and restrictions:	The indicator is calculated on the basis of reporting data on public debt as part of the monitoring of public debt, as defined by the Order of the Minister of Finance of the Republic of Kazakhstan dated December 4, 2014 "On Approval of the Rules for Budget Execution and its cash management", as well as statistical data on GDP. This level of debt should not exceed 50% of GDP, set for the member states of the Eurasian Economic Union.
6. Data availability and disaggregation	
Data availability and gaps:	Public debt data is available on the page of the Ministry of Finance of the Republic of Kazakhstan on the Unified Portal of Internet resources of government agencies, the value of GDP is posted on the website of state statistics.
The level of disaggregation:	The national debt includes the external and internal public debt.

	The internal public debt is an integral part of the public debt on internal government loans and other debt obligations of the Government of the Republic of Kazakhstan, the National Bank of the Republic of Kazakhstan and local executive bodies to residents of the Republic of Kazakhstan. The external public debt is an integral part of the public debt on external government loans and other debt obligations of the Government of the Republic of Kazakhstan and the National Bank of the Republic of Kazakhstan to non-residents of the Republic of Kazakhstan.
7. Comparability with international data/standards	It is an international indicator
