3. Glossary

Foreign trade in goods - the import and export of goods between a Member State and third countries.

Mutual trade in goods - import and export of goods between Member States.

Export of goods - the export from the territory of one Member State to the territory of another Member State of goods that reduce the stock of material resources of the Member State.

Import of goods - importation into the territory of a Member State from the territory of another Member State of goods that are added to the stocks of material resources of the Member State.

4. Methodological notes

Mutual trade statistics are formed on the basis of statistical reporting data 1-TS "Report on mutual trade in goods with the member states of the Eurasian Economic Union" by the Bureau of National Statistics of the Agency for Strategic Planning and Reforms of the Republic of Kazakhstan in accordance with the provisions contained in the official publication of the UN Statistics Division " Statistics of International Trade in Goods: A Guide for Compilers" and the Unified Methodology for Maintaining Statistics of Mutual Trade and Customs Statistics of Foreign Trade in Goods of the Member States of the Eurasian Economic Union, approved by the Decision of the Board of the Eurasian Economic Commission dated December 25, 2018 No. 210.

The Commodity Nomenclature of Foreign Economic Activity of the Eurasian Economic Union is used as a classifier of goods.

Accounting for goods in the statistics of mutual trade in goods is carried out mainly on the basis of a common trade system, which involves accounting for all goods transferred between Member States that are added to the stocks of material resources of the Member States as a result of their importation into the territory of one Member State from the territory of another Member State or reduce the stocks of material resources of the Member States as a result of their export from the territory of one Member State to the territory of another Member State.
