Price statistics

Did you know that ...

- In December 2018 the highest prices for 1 liter of AI-95 petrol among the countries of the European Union are noted in the Netherlands, Italy – 1.52 euros, Greece – 1.51 euros, Denmark – 1.50 euros. It is almost four times more expensive than gasoline of the similar brand in Kazakhstan. For reference: the average price of 1 liter of petrol of AI-95 in the Republic of Kazakhstan in December, 2018 was 175.29 tenges
- In December 2018, the world market price for wheat was \$ 215 per ton, and in the domestic market of Kazakhstan it was sold at \$ 117.

Price statistics in the Republic of Kazakhstan are represented by more than 20 major indices, each of which is detailed according to accepted standard classifications.

Price statistics are used to assess the state of the market economy, the impact of price changes on the standard of living of the population and business activity.

The consumer price index characterizes the change over time of the average price level for a fixed list of goods and services purchased by the population for personal consumption. This indicator determines the level of inflation..

The price index of enterprise-producers of industrial products (goods, services) characterizes the change in prices for finished industrial products produced by industrial enterprises of the republic, and for services rendered by them, of an industrial nature.

The producer price index of agricultural products characterizes the change in prices for types of products produced by agricultural enterprises and peasant or farms and for them sold through various distribution channels.

The price index of export deliveries of goods, products characterizes the change in prices for goods produced in the country and exported to other countries.

The price index of imports of goods, products describes the change in prices for products purchased in the countries of the world community for the needs of the republic.

The price index in construction describes the change in prices for the material and technical resources used at all stages of the construction industry: construction and installation work, machinery and equipment, other works and costs.

Price indices in the housing market characterize the change in prices for the sale and rental of residential properties.

The tariff index for the carriage of goods by all modes of transport characterizes the change in tariffs for services for the carriage of goods by various modes of transport.

The index of tariffs for postal and courier services characterizes the change over time of tariffs for postal and courier services rendered to legal entities.

The index of tariffs for communication services characterizes the change over time of tariffs for communication services provided to legal entities.
