Brief methodological explanations

A **preschool organization** is an educational organization that is created to meet the needs and demands of the family in caring for children, their harmonious development on the basis of general cultural and national values, preparing the child for the initial stage of secondary general education, creating the necessary conditions for parents to continue their work and study, and actively participate in public life.

Preschool organizations are divided into types: nursery, nursery-kindergarten, kindergarten, complex «school-kindergarten», mini-center.

The **availability of places for children** in preschool organizations (there are children per 100 places) is determined by the ratio of the number of places in preschool organizations to the number of children in them.

A general education school is an educational institution that implements general education curricula of primary, basic secondary and general secondary education, as well as additional education curricula for students and pupils.

Educational organizations of technical and vocational education (school, college) – organizations that implement professional programs of technical and vocational education aimed at training qualified workers and middle-level specialists in the main areas of socially useful professional activity).

Higher educational institutions – educational institutions that implement professional training programs of higher and postgraduate education, aimed at training specialists with the assignment of qualifications and (or) the academic degree «bachelor», as well as scientific and pedagogical personnel of the highest qualification.
