Features and benefits of «Taldau»:

- Data representation in a variety of tabular, graphical, map types and split;
- Provision of tools for statistical analysis (data comparison by regions and classifications, building a dynamic series and correlation analysis);
- Data analysis tools provider;
- Upload the selected data or the analysis results in common data formats (excel, pdf; json);
- Search by keyword and by classification's element name.

«Taldau» includes the following modules:

«Personal account» – each user has an opportunity to create the "Personal account", where will be able to create own tables, graphs, diagrams, and keep it on personal page.

«Indicators search» – includes a quick search of indicators by keyword and prompt search by element's name of classification.

«Analytics» – allows users to conduct their own comparative analysis by necessary indicators, also to use the types of analysis inherent in the system.

«Sections of Statistics» – contains information by the selected field of statistics.

«Constructor» – allows user to build their own chart of statistical indicators loaded in Taldau.

«Regions» – include full statistical information on each of the 17 regions of Kazakhstan.

«Taldau» has more than 3000 statistical indicators, which are updated on a regular basis and displayed in dynamics for a number of years, since 2000 annually, since 2011 monthly and quarterly.

You can view all statistical indicators on «Taldau» by clicking on the Committee's the web-site www.stat.gov.kz.

e-Statistics for user

«e-Statistics» Integrated Information System is a full automation of statistical activities, including the opportunities to send statistical forms online, store and process statistical data, statistical information review and analysis

«e-Statistics» includes the following information systems:

- Committee's Internet Resource;
- On-line Data Collection;
- Information-Analytical system;
- Internal Intranet portal;
- Primary Statistical Data Storage;
- Primary statistical and administrative information processing;
- Aggregated data Database;
- Classifiers and Standards;
- Metadata;
- Statistical Population Register;
- Statistical Business Register;
- Housing Stock Statistical Register;
- Agricultural Statistical register;
- Administrative Information Database;
- Integration Component.

«On-line Data Collection» was developed in order to reduce the burden on respondents. Respondents can submit reports remaining at the workplace, by using electronic digital signature of the National Certification Authority over the Committee's Internet resource www.stat.gov.kz or https://cabinet.stat.gov.kz.

Advantages of the «Respondent's Office»:

- No need to import an electronic digital signature into the used browser;
- Authorization and reports signature with the possibility of using e-token, kaztoken devices, electronic digital signature on the identity card etc.;
- Electronic statistical forms delivery in the online mode;
- Electronic submission of a certificate of activities absence;
- View the list of statistical forms (slider) trough the possibility to enter the respondent's BIN / IIN for statistical bodies submission without authorization;
- Printout of the report and notification for previous periods;
- View the reports delivery history;
- View and print out the list in the presence of statistical forms debts;
- Possibility to quick change of contacts or type of economic activity.

The Committee's Official web-site www.stat.gov.kz – is one of the "e-Statistics" priority components, it's the most important channel for disseminating always relevant and reliable statistical information. The Committee's new official web-site was launched on June 1, 2019. The advantages of the new web-site is the design and structure improvement, compliance with requirements for state bodies Internet resources, as well as a single point of access to all information resources of the Committee.

«Taldau» Information-Analytical System

In order to meet the population needs in the official statistical information Committee publishes data in Taldau.

The system is implemented to provide the population, state bodies, enterprises and organizations with all relevant statistical information on the statistical indicators in a convenient interactive mode.
