1. Key points

The Gross Domestic Product by final expenditure method in January-December 2023 (according to preliminary data) amounted to 118823571,8 million tenge.

GDP increased by 5,1% in real terms compared to the corresponding period last year.

GDP by production method in January-December 2023 (according to preliminary data) amounted to 120561096,4 million tenge.

The statistical discrepancy between GDP methods of production and end use was 1737524,6 million tenge or 1,4% of GDP.

2. GDP by use components

Table 1

GDP by final use method for January-December 2023

	At current prices, million tenge	To the previous year, in percent		In percentages to the end
		IPV	deflator	
Final consumption expenditure	74 759 566,3	105,6	113,9	62,9
households	60 987 384,6	104,5	114,5	51,3
government bodies	13 313 807,0	110,3	110,8	11,2
for individual goods and services	6 734 964,4	108,3	111,5	5,7
for collective services non-profit organizations serving households	6 578 842,6	112,3	110,2	5,5
Gross capital formation	458 374,7	112,0	117,9	0,4
gross fixed capital formation	35 635 038,3	119,5	115,0	30,0
change in inventories	31 674 154,0	120,7	114,3	26,7
Net export	3 960 884,3	-	121,1	3,3
export of goods and services	8 428 967,2	-	-	7,1
import of goods and services	41 219 128,9	101,9	93,8	34,7
Gross domestic product by end use method	32 790 161,7	114,7	102,9	27,6
Gross domestic product by production method	118 823 571,8	105,1	109,3	100,0
Statistical discrepancy*	120 561 096,4	105,1	111,4	-
	1 737 524,6	-	-	-

*Statistical variance is the difference between gross domestic product calculated by the production method and the end use method.

In the structure of GDP by use components for January-December 2023 and the share of expenditures on final consumption amounted to 62,9 %, gross capital formation – 30%, net exports – 7,1 %.

GDP structure by use components

Picture 1

in percentages

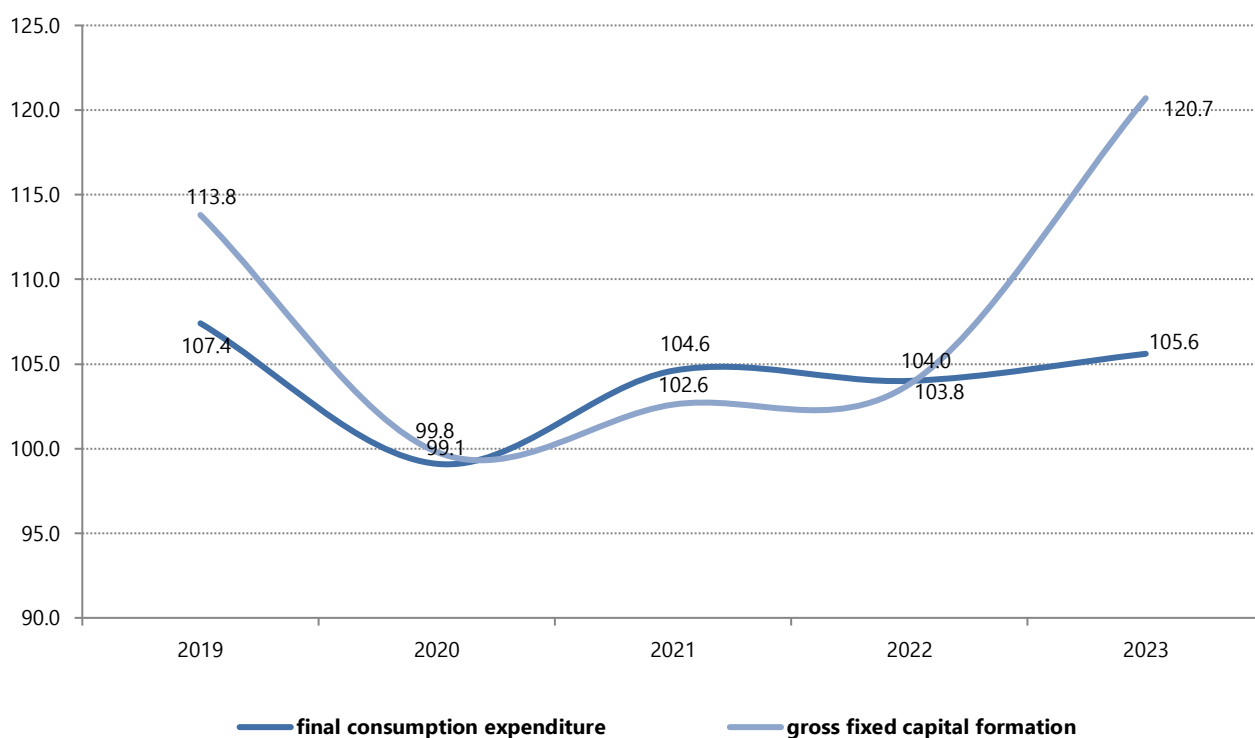

Compared to the corresponding period last year, in real terms there is an increase in the final consumption expenditure component by 5,6% due to an increase in household final consumption expenditure by 4,5% and general government expenditure by 10,3%.

Gross capital formation shows an increase of 19,5% compared to the corresponding period last year .

3. Glossary

Gross domestic product (GDP) - one of the most important indicators of the system of national accounts, characterizing the final result of the country's economic activity.

Contribution - the value of the influence of the percentage change in the indicator on the total value of GDP.

Final consumption - the consumption of goods and services fully used by individual households or society as a whole to satisfy their individual or collective needs and requirements.

Gross capital formation - the total value of gross fixed capital formation, changes in inventories and acquisitions of valuables less their disposal.

4. Methodological notes

Gross domestic product calculated using the final use method is the sum of all economic sectors' expenditures on final consumption, gross capital formation and net exports.
