S. 2 Introduction-Relevance

Culture - a set of material and spiritual values created by mankind, and to meet the spiritual needs and interests of people.

The basis for the formation of culture statistics are statistical reports of cultural institutions, one of which is the form 1-circus "Report on the activities of the circus".

The main users are the Ministry of Culture and Sports of the Republic of Kazakhstan, local executive bodies and other departments.

The Bureau of national statistics holds meetings of working groups (focus groups), with the participation of potential users and respondents, representatives of interested government agencies, as well as NPP "Atameken", at which the indicators of national statistical forms are analyzed in detail for their relevance and the elimination of duplication with indicators departmental statistical forms and forms of administrative data.

Feedback from users is carried out through the blog of the Minister of National Economy of the Republic of Kazakhstan on the website of the Ministry of National Economy of the Republic of Kazakhstan.

S.13 Quality management
S.13.1 Quality assurance

The quality and reliability of cultural statistics data is supported by generally accepted procedures:
- monitoring of the list of cultural institutions provided by administrative sources.
- compliance with the basic principles of primary accounting;
- use of standard statistical classifications of goods, products, services;
- at the stages of collection and processing of primary data, all control schemes (format-logical, arithmetic) have been developed and implemented;
- to confirm the reliability of primary statistical data, the possibility of obtaining additional information from respondents is legally enshrined;
- a comparative analysis of statistical data is carried out (in dynamics, with administrative data, cross-sectoral).

S.13.2 Quality control

An annual survey of users of official statistical information is carried out according to the questionnaire Q-002 "Survey of users".

S.14.2 User Satisfaction
S.14.3 Completeness / R1. Data completeness-share
S.15 Accuracy and reliability (to be completed according to the type of observation)
S.15.1 Overall accuracy

The National Survey on Circus Statistics is designed in such a way that possible errors can be minimized and controlled. Nevertheless, during the survey, inaccuracies are possible, which are called random errors in statistics (incorrect filling of data on the number of activities carried out by third-party organizations at the circus site, operator error when typing a report, etc.), even if the survey was carried out with the greatest care. Such errors are detected and corrected by the Statistical Departments of the oblasts and the Committee on Statistics in the course of statistical observation.
